DETAILED ACTION

1. This is in response to the decision rendered by the Board of Appeal on 12/16/2009.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the meaning of the term "computer program product" used in claims 15 and 20 is not apparent from the descriptive portion of the specification with clear disclosure as to its import; and in mechanical cases. The term should be identified in the descriptive portion of the specification by reference to the drawing, designating the part or parts therein to which the term applies. A term used in the claims may be given a special meaning in the description.
**>See MPEP § 2111.01 and § 2173.05(a).< Appropriate correction is required.

Claim Objections

4. Claims are 10 and 19 objected to because of the following informalities: the term "a communications" should read a communication. Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 recites the limitation “the mobile host” in line 13. There is insufficient antecedent basis for this limitation in the claim.

Claims 9 recites the limitation “the network interfaces” in line 5. There is insufficient antecedent basis for this limitation in the claim.

Claim 9 recites the limitation “the mobile host” in line 10. There is insufficient antecedent basis for this limitation in the claim.

Claim 10 recites the limitation “the mobile host” in line 10. There is insufficient antecedent basis for this limitation in the claim.

Claim 15 recites the limitation “the mobile host” in line 15. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 101

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

7. Claims 15 and 20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The cited claims present no evidence of an explicit and deliberate definition in the specification limiting the claim language, the broadest reasonable interpretation of "computer program product" which would be fairly conveyed to one of ordinary skill in the art is a "produced computer program".
